(for additional space PTO)

Government
of South Australia

Bushfire Management Area Plan Submission to Comment

Please attach any additional material or comments

Bushfire Management Area Plan Submission to Comment

Preparing a Submission

CFS Bushfire Management Planning Unit are receiving submissions on behalf of Bushfire Management Committees.

How to make an effective submission:

- State the plan to which you are referring to
- Be precise in what you are referring to such as the asset, township, strategy etc.
- Make your comment concise and clear
- Identify those parts of the plan with which you agree and / or disagree with
- State your reasons if you disagree with parts of the draft plan, say what you would prefer as an alternative and why
- Reference your information source when offering feedback on the accuracy of information

What will be considered

After the closing date every submission will be evaluated by the Bushfire Management Committee and carefully considered.

The Bushfire Management Committee will consider making amendments to a plan when a submission:

- Provides additional information of direct relevance to management
- Indicates or clarifies a change in government legislation, management commitment or management policy
- Proposes strategies that would better achieve or assist with management objectives
- Prompts a re-consideration of the objective and/or strategy and results in an alternative objective and/or strategy
- An alternative viewpoint has been received on the topic and is considered to be a better option than that proposed in the draft or current plan
- Indicates omissions, inaccuracies or a lack of clarity in the plan

The plan may not be amended if the submission:

- Addresses issues beyond the scope of the plan
- Proposes amendments already in the plan
- Offers an open statement or no change is sought
- Clearly supports the draft proposals
- Is an alternative viewpoint but the current arrangements are still considered the best option
- Is based on incorrect information
- Contributes options that are not possible (generally due to some aspect of existing legislation or Government policy)
- Is repeating or duplicating a previous submission that has been evaluated and determined that it will not make an amendment to the plan

*Please note that your submission will become part of the public record and available to anyone who requests a copy, unless you specifically request otherwise.
